II. Background.

The NRC issues RISs to communicate with stakeholders on a broad range of regulatory matters. This may include communicating staff technical positions on matters that have not been communicated to or are not broadly understood by the nuclear industry.

The NRC staff has developed draft RIS 2014-XX, "Oversight of Counterfeit, Fraudulent, and Suspect Items in the Nuclear Industry," to heighten awareness of the existing NRC regulations and how they apply to the nuclear stakeholders' oversight of CFSI. The NRC assessment is that the regulatory provisions identified and discussed in the draft RIS:

- (i) provide sufficient authority for the NRC to take regulatory action addressing CFSI issues within the scope of the NRC's regulatory authority and jurisdiction; and
- (ii) are sufficiently clear and comprehensive to alert regulated entities with respect to their responsibilities and obligations with respect to CFSI as established under those NRC regulatory provisions.

The NRC requests comments on the NRC's assessment. If commenters disagree with the NRC's assessment, then the NRC requests that commenters identify the specific matter or area in which the NRC's regulatory infrastructure is deficient or incomplete, and how the NRC could address or rectify the deficiency or incompleteness. Comments identifying needed changes

would be most helpful if they describe the entities involved, the specific matter, situation or deficiency in the NRC's infrastructure, and a description of the proposed activity or regulatory prohibition needed to successfully address the matter, situation or deficiency.

The RIS, if issued in final form, may be used by all NRC's licensees and certificate holders, Agreement State radiation control program directors, state liaison officers, contractors and vendors. The draft RIS explains that these entities may review this information and consider actions, as appropriate, to prevent CFSI from entering their supply chains, prevent possible installation or use of CFSI at their facilities, and raise awareness of the potential for CFSI to be used in the manufacture of items, including sealed sources and devices. The draft RIS is available electronically in ADAMS under Accession No. ML14192B407.

Public Meeting

The NRC plans to hold a public meeting to discuss the draft RIS and the issues associated with CFSI. The NRC will consider oral comments made in developing the final RIS, but the NRC will not prepare formal written comment responses to oral comments made at the

public meeting. You may submit written comments either electronically or in writing, as described in the ADDRESSES section of this document. Additional details regarding the meeting will be posted at least 10 days prior to the public meeting on the NRC's Public Meeting Schedule Web site at <http://www.nrc.gov/public-involve/public-meetings/index.cfm>.

Dated at Rockville, Maryland, this 25th day of September 2014.

For the Nuclear Regulatory Commission.
